

Wood Pellet Heating Systems

AIR STOVES

Heat the room where the stove is fitted only.

NATURAL CONVECTION

Amazing heat exchange that allows heating without a room fan, for the ultimate in silent, natural flames.

DUCTABLE STOVES

Heat another room or rooms via the integrated ducting option.

BOILER STOVES

Stoves with a boiler for central heating and hot water. Also offers controllable heat to the room where the stove is fitted.

SLIMLINE STOVES

For restricted spaces and minimal intrusion into the room.

INSERT STOVES

Fully integrated into the wall for that "TV screen" look.

BOILERS

Compact boilers for Utility/Plant rooms or fully automatic boilers for installation in a shed/garage.

- Exceptional efficiency – up to 98%!
- Clean, cheap, convenient fuel
- Control via your Smartphone
- Integrate with home heating controls
- Wide range of styles & types

* select models only

Heating with wood pellet

Enjoy steady heat and optimum comfort without the hassle. Press the button, sit back, relax and enjoy the flickering flames! All our wood pellet stoves are fully automatic with minimal intervention from the user, yet they provide fantastic heat and offer a beautiful, lively flame and a wonderful focal point for any room, large or small.

Elegant in design, convenient in operation, clean, environmentally friendly and very cheap to run, wood pellet stoves are rapidly becoming a choice heating source for many homeowners and it's easy to see why.

When you add our level of technical service, experience and commitment, then we feel that we're the right choice.

A good quality wood pellet stove or boiler is the leading alternative to fossil fuels for simple space heating, for central heating and for hot water. Wood pellet systems are perfectly suitable to replace solid fuel systems, oil systems, gas systems and even heat pumps.

They are perfect for heating standard radiators, low temperature radiators, underfloor heating and hot water so they're just about the most flexible and easy-to-manage system on the market today.

All wood pellet stoves that we sell are tested and approved to all relevant standards, incl. TUV, and furthermore, we extensively test all our products in-house, before selling them to the public.

Installation & Maintenance

SALES NETWORK

The correct installation starts at your purchase! Contact one of our sales team or a dedicated Authorised Dealer today, who'd be delighted to help you choose a stove.

TECHNICAL SUPPORT

With a dedicated technical support department and a team of qualified technicians covering the whole country, we are head and shoulders above our competition, in terms of our back-up service to our customers.

COMMISSIONING

We commission every stove we sell! So we'll make sure it's right for you, for your home and safe for your family.

This makes it easy to select an installer as they don't need specific experience in wood pellet, they just need to be a competent stove fitter or plumber.

For more information on any of our products or services please visit us on the Web at: www.woodpelletstoves.ie

Correct installation of your stove is very important. Installation should strictly only be carried out by suitably trained and qualified individuals. Your installer should also show you how to use and maintain your new appliance. Always ask for credentials and references when choosing an installer.

For your convenience, we offer a full technical aftersales service, including maintenance and repairs. Our dedicated technical department is there for our customer's peace of mind and sets us apart from our competitors.

Please note that your choice of installer or maintenance technician is solely your responsibility and your appliance's warranty is strictly dependent on correct installation and

NB: We do not endorse or recommend any particular installers. See our website www.woodpelletstoves.ie for further details.

Commissioning

The first ignition and commissioning of your new stove must be carried out by an Authorised Technician. If commissioning is not carried out by such an individual, your stove warranty is immediately voided. Contact us today to arrange your FREE commissioning on 083 123 6445.

Spare Parts

We carry a full stock of stove and boiler spare parts, warehoused here in Ireland. This means that in the unlikely event of component failure, we will have you up and running again in no time at all.

The fuel: wood pellets

Wood pellets are environmentally friendly, clean-burning & cost-effective. Made from timber by-products such as sawdust & other waste wood, wood pellets typically measure 6mm in diameter & are around 20mm long. Wood pellets are conveniently packaged in 10kg or 15kg bags for easy handling & can be purchased in your local hardware or fuel store.

Warranty

Your new stove carries a limited warranty (length varies) which covers parts & labour for any defects in your stove. We also offer warranty extensions for up to 7 years!
